

Company Profile Overview

Beydan Engineering Services & Consultancy LTD (BEYDAN) is a strategic consulting and engineering firm established in **2016**, with headquarters in **Nairobi, Kenya** and **Mogadishu, Somalia**. We deliver **strategic advisory, engineering design, and implementation support** to public institutions, development partners, UN agencies, NGOs, and private-sector clients across the **Horn of Africa (HoA)** and the **East African Community (EAC)** region.

We combine strong consulting capability with practical engineering expertise to help our clients **plan smarter, deliver efficiently, manage risk, and achieve measurable results** particularly in complex, multi-sector environments. Our work spans critical development and economic sectors, including **financial and economic development, Quality Infrastructure (QI), fisheries, agriculture, livestock, governance, roads and infrastructure, environment and urban development, SDGs, industrial development, food safety, research studies, and capacity-building programs**.

Vision, Mission & Motto

Vision: To be a trusted regional partner delivering high-impact consultancy and engineering solutions that accelerate sustainable development and resilient growth.

Mission: To provide practical, evidence-based advisory and engineering services that strengthen institutions, improve infrastructure delivery, and enhance project performance across sectors.

Motto: *Practical Solutions. Trusted Professional Partner. Sustainable Impact.*

What We Do

BEYDAN provides end-to-end support across consulting/advisory and engineering services from **strategy and planning to design, supervision, implementation, and performance monitoring**.

A) Consultancy & Advisory Services

- **Project & Program Management (PMO):** planning, scheduling, delivery tracking, governance structures
- **Feasibility Studies & Business Cases:** technical, economic, social, and environmental analysis
- **Monitoring, Evaluation, Accountability & Learning (MEAL):** results frameworks, indicators, reporting systems
- **Policy, Strategy & Institutional Development:** roadmaps, reform support, operating models
- **Procurement & Contract Management Support:** bid documents, evaluation support, contract administration

- **Organizational Capacity Building:** training, ToT, SOP development, process re-engineering
- **Risk, Compliance & Quality Management:** QA/QC frameworks, audits, performance improvement plans
- **Stakeholder Engagement & Communications:** consultations, facilitation, change management

B) Engineering Services

- **Engineering Design & Studies:** preliminary/detailed designs, BoQs, specifications
- **Construction Supervision & Site Management:** quality, progress, safety, contractor performance
- **Infrastructure Planning:** master planning, asset management approaches
- **Technical Assessments & Due Diligence:** condition assessments, compliance checks, technical audits
- **Environmental & Social Support:** screening, ESMP support, implementation monitoring
- **Operations & Maintenance Planning:** O&M manuals, lifecycle planning, operator training

Sector Coverage

- **Infrastructure & Urban Development:** real estate, roads, public facilities, utilities support
- **Energy & Renewables:** technical advisory and implementation support
- **Agriculture & Livelihoods:** value-chain infrastructure, feasibility studies
- **Industry, Trade & Private Sector Development:** SME support, compliance/quality readiness
- **ICT & Digital Systems for Projects:** MIS/IMIS support, workflow digitization
- **Humanitarian–Development Nexus Projects:** delivery support in fragile contexts

Geographic Focus

Horn of Africa (HoA) and East African Community (EAC).

BEYDAN delivers assignments through local presence and regional networks enabling rapid mobilization, flexible deployment, and context-aware delivery.

Our Delivery Approach

1. **Diagnose:** Understand context, constraints, stakeholders, and baseline data
2. **Design:** Develop options, technical solutions, and implementation plans
3. **Deliver:** Manage execution with strong governance, QA/QC, and reporting
4. **Transfer:** Build client capacity through training, tools, and documentation
5. **Sustain:** Embed systems for maintenance, performance monitoring, and continuous improvement

Why Clients Choose BEYDAN

- **Integrated capability:** Strategy + engineering under one roof
- **Regional experience:** Strong HoA and EAC operational understanding
- **Quality & compliance mindset:** structured documentation, strong controls, clear reporting
- **Practical outputs:** implementable recommendations—not theory
- **Stakeholder-savvy:** effective facilitation and coordination in multi-partner environments

Corporate Values

- **Professionalism & Integrity**
- **Quality & Accountability**
- **Client Focus & Responsiveness**
- **Innovation & Continuous Learning**
- **Safety, Sustainability & Inclusion**
